CARBON HAS GREAT OIL FIELD, STATES E. HODGSON

A public meeting was held in the Farmers Exchange hall, Carbon, on Monday night to discuss the drilling of an oil well on the leases of the Carbon Exploration Company, a company composed of Carbon and Calgary interests, and also to inform the people who are not interested in the company, the possibilities of oil to be obtained in the Carbon field. J. A. MacDonald, president of the Carbon Exploration Company, presided at the meeting and after a few words from Mr. D. A. McCannell of Calgary, the speaker of the evening, Mr. Edward Hodgson, eminent geologist of world-wide reputation addressed the meeting, telling of his experiences in other oil fields in Europe, Mexico and California and in his remarks Mr. Hodgson stated that the Carbon Oil Structure was identical with the structure of the greatest oil field in the world, namely that in California, and that in his estimation the Carbon field was greater in size than that of the proven one in the Southern country. Mr. Hodgson stated that he had no hesitation in saying that should the Company drill for oil on its leases here that they would strike oil at a very shallow depth and on inquiring at what this depth would be he made the statement that there would be four oil sands, as was the case in the California field. The first would be at a depth of approximately 1600 feet, the second at 2200 feet, the third at about 3200 feet and the fourth at about 4500 feet down. The speaker stated that this estimation was made from the kind of rock that was showing on the surface of the oil structure. According to the geologist, the cost of putting down a well to the oil sands will not be great and he has advised the company to drill their own well rather than the custom of getting a company to drill and give them a certain percentage of the stock.

After the public meeting, a private meeting of the directors of the Carbon Exploration Company was held and fuller details of financing were discussed, although this has not been made public to date.

For the benefit of those who are not aware of the details of the formation of the Company it may be remembered that about a year ago a syndicate was formed in Carbon and some 19,000 acres of oil leases were taken up. Since that time a Company has been formed, which originally was the Syndicate, and this Company was known as the Carbon Exploration Company and this summer a test well was put down to show the gas deposits in the field. This well was a success and at the depth of 660 feet a tremendous gas flow was struck and it was estimated at the time that there was sufficient gas in this well to furnish Carbon with heat and light for all time to come. Since that time nothing further has been done except to get a more favorable report on the field and possibly to get a drilling company to take hold of the project. Now, however, with the very favorable geologist's report, this idea has been abandoned and the company, in order to give the greatest benefit to the stockholders, has decided to raise funds and do the drilling themselves, and in the event that the Company's holdings prove out, the stockholders will be the ones to benefit and not the drilling company.

Should any individual wish to procure any shares in the company, they now have the opportunity to do so at an attractive price. For further information apply to the Secretary of the Company, Mr. S. F. Torrance.

Carbon has a miniature golf course. The boys of the town have had this course in operation for nearly a month on a back lot and although we have known this for some time we were not just decided whether or not to advertise the fact for fear that the town might be marked as another that had "gone loony." However, now that we have read of other towns with one of these runt golf courses, we have told the public.

WEDDINGS DOUBLE WEDDING IN CARBON

A double wedding of considerable interest to the people of Carbon and to the South of us, took place last Thursday morning, September 25th, when Miss Rose Neher became the bride of Adam Buyer, and Miss Elma Buyer became the bride of Mr. Gottlieb E. Schell. News of the wedding was kept quiet until Thursday morning, and only immediate relatives were present. Rev. A. Ittermann of the German First Baptist church performed the ceremony and shortly afterwards the happy young couples left on a motor trip to visit with relatives in North and South Dakota. On returning both young couples will reside on their farms near Carbon.

TOWN PLANNING IN ALBERTA

(By Horace L. Seymour)

Being a series of short articles explanatory of the provisions of The Alberta Town Planning Act and Regulations thereunder.

ARTICLE 5

Maintaining the Scenic Advantages of Alberta Highways. Sign Boards

Regulations prepared by the Provincial Town and Rural Advisory Board and now made effective by order in council should not only directly benefit the rural areas of the Province, especially in years to come, but will be appreciated by city and town dwellers and by the ever-increasing number of tourists.

We read of the struggles to maintain scenic attractiveness on the highways, in many of the states in the country to the south of us, which, a century ahead of Canada in population, has for several decades been conscious of the sign board menace. In Canada we have been more fortunate, and before population becomes too great or development too intense, several Provinces are already operating under regulations in regard to outdoor advertising.

The Alberta Regulations (applying only outside cities, towns and villages) with exceptions for official highway signs or directional signs are to the effect that:

Signs shall be erected only within two miles of any city or town; shall not be closer than 500 feet to each other; shall not be erected closer than 500 feet to road intersections or railway crossings; and shall not be erected closer to the centre line of the highway than one hundred and sixty feet. Even where otherwise permitted in such limited zones, signs must be omitted that in any way might constitute a traffic hazard, obstruct desirable views, or are objectionable to residents.

Every sign is to bear the label showing the name of the owner or person responsible and must be licensed for the calendar year on application to the Director of Town Planning, Parliament Buildings, Edmonton.

PROPOSED WAR-TIME SCHEME TO MARKET CANADIAN WHEAT

Advices from London indicate that the Labor Government is devoting itself to development of the Thomas plan for the bulk purchasing of Canadian grain and wool, meat and dairy products from this and other sections of the Empire.

The British Government intends to have the proposal worked out for submission to the Economic Conference which meets in London this month.

British comment evidences a growing recognition of the fact that the Dominions insist upon mutuality of preferences within the Empire. The MacDonald Government, and particularly Chancellor Snowden, stands rather uncompromisingly against taxes on food in Britain and the Thomas plan is conceived as an alternative

HOOT GIBSON IN "POINTS WEST"

Hoot Gibson hits the trail for the law and love in "Points West," Universal's latest western picture, which will be shown at the Carbon Theatre on Friday and Saturday of this week. "Points West" was written by B. M. Bower, one of the most popular western fictionists and the author of two of Gibson's greatest screen successes, "Chip of the flying U" and "The Calgary Stampede."

Gibson was never better in any of his westerns than in this new feature film and receives exceptionally strong support from such players as Alberta Vaughn and Frank Campeau. A logical plot, whirlwind action, unusual photography and hair-raising situations combine to make "Points West" a picture that will not soon be forgotten.

Miss Vaughn, of course, is the girl in the story and Campeau is the "heavy." Campeau is as perfect a "heavy" western type as Gibson is a western hero. They are supported by Jack Raymond, Martha Franklin, Milt Brown and Jim Corey.

Art Rosson directed the picture and so pleased were Gibson and Universal officials that he was signed to direct another.

"Points West" was adapted to the screen by Rowland Brown and titled by Harold Tarshis.

which may give the Dominions the advantage sought in return for preferences on all manufactured goods entering the Dominions.

A number of the officers and members of the Carbon Elks Lodge motored to Drumheller on Wednesday night to accompany District Deputy J. A. MacDonald, who paid an official visit to the Drumheller Elks Lodge on this occasion.

BANK OF MONTREAL CROP REPORT

General—Taking the Prairie Provinces as a whole, threshing is well advanced, with wheat 70 per cent completed. Recent wet weather has impeded harvesting, particularly in the Northern sections of Saskatchewan and Alberta. Yields are better than those of last year and, up to the present the grades are good, but following the recent wet spell some deterioration may result. In Quebec wet weather has delayed the completion of grain harvesting. Threshing shows a heavy yield of good quality. In Ontario the threshing is nearly completed under favourable conditions. Grain yields on the whole are above the average and of good quality. In the Maritime Provinces the weather has been seasonally good. Grain harvesting is practically finished and the crops are a good average. In British Columbia the weather has been cooler, with a touch of frost reported in the interior of the Province. The threshing of grain is completed and the crop is about 90 per cent of average and of good quality. Details follow.

Alberta, Northeastern area—Threshing is about 10 per cent completed. Wheat yields are from 8 to 30 bushels.

Oats about 30 bushels.

Southeastern Alberta—Threshing is 65 per cent completed, average wheat yields are 9 to 12 bushels, chiefly grading No. 1 Northern.

Western Alberta—Threshing has begun in the north and 75 per cent is done in the south. Yields vary from 5 to 30 bushels, grading No. 2; oats yield about 30 bushels. The digging of beets has commenced earlier than usual.

Saskatchewan, Northern Area—After a week of steady rain, threshing which is about 60 per cent completed is now being resumed and 10 to 14 days will be required for completion. Rain has caused sprouting in some sections with resultant deterioration in grade.

Southern Saskatchewan—Threshing is 90 per cent completed. Recent rains in some localities will assist fall cultivation.

Manitoba—Heavy winds and intermittent rains have interrupted threshing operations, which are, however, 90 per cent completed and have now been resumed. Good quality grains are being harvested, wheat yields averaging approximately 18 bushels, while coarse grains are a good average crop. There is a tendency not to market coarse grains owing to low prices.

Mistakes when recognized and analyzed are the richest pay dirt a man can pan.

MALLEABLE

COMPACT

FOR THREE BIG DAYS

OCTOBER 6, 7, & 8, INCLUSIVE

THROUGH SPECIAL ARRANGEMENT, an expert from the MONARCH Factory—the Largest, Finest Malleable Range Factory in America—will be here to explain everything to you—the superiority of MONARCH construction—the many time and fuel saving features as well as the details of our special offer during this sale period. You are going to have an opportunity to see the most beautiful range display ever shown anywhere, a display of the remarkable New MONARCH Range Design.

THE RANGE BUILT TO CONFORM WITH THE MOST MODERN PRACTICAL IDEAS OF THE DAY.

Whether you need a range now or later, come in and see this interesting and educational display.

Every housewife appreciates the advantage and needlessness of great, large kitchens with ungainly equipment.

That's why large kitchens are not being built today. MONARCHS are COMPACT in all their dimensions without sacrificing a fraction of an inch of needed space.

COMPRISING EFFICIENCY, ECONOMY, DURABILITY, BEAUTY And COMPACTNESS.

REMEMBER TOO—that a beautiful, practical 12-piece set of Never-Stain Steel Cutlery, or a valuable set of Vollrath Enamel Ware in Pink-Pearl or Apple-Green finish will be given ABSOLUTELY FREE to everyone purchasing a MONARCH Range During this Special Sale.

The MONARCH Practical Payment Plan enables you to buy your range now—during this sale—on monthly or single payments—if you haven't the ready cash.

Russia's Five-Year Plan

Under all normal conditions the people of Western Canada would display merely an academic interest in events transpiring and developments taking place in Russia, but for some time past, and to an ever-increasing extent, Russian policy has had a bearing and a definite effect upon the prosperity of this portion of the Dominion, in fact upon the whole business structure of Canada, as well as of other countries.

It is difficult to find out exactly what is taking place in Russia, as many reports are both confusing and contradictory, consequently it is not surprising that people in this country are still puzzled and uncertain in their minds whether Russia constitutes a real and permanent menace to Canada, not politically or in a military sense, but economically.

Certain things have, nevertheless, become fairly well established. For example, it is known that in October, 1928, Russia inaugurated what is known as the "Five-Year Plan" of national development which observers on the spot in Russia describe as "the most interesting economic experiment anywhere in the world."

On October 1, 1930, the second year of this experiment will come to a close. So substantial has been the progress made that now the slogan is: "The Five-Year Plan in Four Years." What is this "Five-Year Plan?" It was outlined by a Soviet Government agency over a year ago, and, in part, the plan—

"Provides for total capital investments in the five years beginning October 1, 1928, of \$33,000,000,000, or about two and one-half times the actual investments in the preceding five years. A goodly share of this will go for the construction of industrial plants and for the purchase of foreign equipment and machinery. The foreign-trade programme calls for imports of about \$3,200,000,000 during the period. Among the outstanding projects scheduled for construction, and in most instances completion, during the five-year period, are two tractor factories with an output of 40,000 units per year each, an automobile factory with an output of 100,000 cars per annum, a score of steel mills to produce over 5,000,000 tons of steel per year, many chemical, textile, machine-building, electro-technical, paper, glass, leather, and other factories, as well as a dozen or more large power plants, many mines, etc."

That was the "Plan," but, according to a Moscow correspondent of the Manchester Guardian, the "Five-Year Plan" in many instances is already surpassing the figures expected to be attained. He says: "The first version of the 'Plan' called for the production of 22,000,000 tons of oil and 10,000,000 tons of cast-iron in 1933; now these figures have been revised upwards, respectively, to 38,000,000 and 17,000,000. During the current year 221 new industrial enterprises, built at a cost of approximately \$425,000,000, have begun to function, and the list of unusually large factories which have been completed comparatively recently, includes a tractor plant, an agricultural machinery factory, a paper mill, a pipe factory, two oil refineries, several electrical stations."

The "Five-Year Plan" also included what practically amounts to the nationalization of agriculture, and the erection of these huge tractor and agricultural machinery factories, oil refineries, etc., are all a part of this new agricultural policy. The Manchester Guardian correspondent in Moscow, further notes that "in collective farming, 25 per cent. of the peasant households have already gone over to the co-operative method, although the 'Plan' originally contemplated only 20 per cent. in 1933."

Russia is now dumping wheat, coal, lumber, into many European and other markets, further demoralizing the already badly demoralized world price for these commodities. The Russian Government is reported as having chartered a large number of vessels to convey wheat from Russia to England, Italy, and other countries, and that this wheat will be sold abroad regardless of price. The United States Government has charged that Russia has engaged in transactions on the Chicago grain markets to force down the price of wheat; the Canadian Government has secured power from Parliament to prohibit Russian imports into Canada; the League of Nations at Geneva, is discussing the effects of Russian policy on all other nations.

It is further alleged that under Soviet auspices this great "Five-Year Plan" is being carried out by poorly-paid labor, and much of it forced labor, even convict labor; that the standard of living has been definitely lowered; that food and even clothing supplies are sharply rationed, with the result that other countries, with higher standards of living and greater individual liberty of action, cannot begin to compete with Russia.

The Bolshevistic propaganda of Russia failed in its efforts to bring about world revolution, but its "Five-Year Plan" of economic development at home with a view to dumping huge quantities of goods and products of all kinds into world markets is, even before the "Plan" is one-half completed, having an adverse effect in all other countries, and further depressing already depressed business conditions throughout the world.

The farmers of Western Canada, who must depend for their success upon making profitable sales of their products in world markets, are among the chief sufferers.

When Food Sours

About two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach nerves have been over-stimulated. There is excess acid. The way to correct it is with an alkali, which neutralizes many times its volume in acid.

The right way is Phillips' Milk of Magnesia—just a tasteless dose in water. It is pleasant, efficient and

harmless. It has remained the standard with physicians in the 50 years since its invention.

It is the quick method. Results come almost instantly. It is the approved method. You will never use another when you know.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

How Saskatoon Is Favored

Saskatchewan City Attracts Many Important Gatherings

Saskatoon has been a much visited city this summer. Recent visitors included the 150 British medicos, while on September 7th came the Sun Life special trains; on the 9th the Canadian Ticket Agents' Association and on September 12th the Dakota farmers—some of whom, it is pointed out, may decide to remain in the region. "Commissioner Joseph Holmes," says The Hub, "had to take special exercises to strengthen his right hand against the intensive period of welcoming the strangers within our gates."

THE ANAEMIC GIRL

Who Has Lost Her Charm and Beauty

"She seems to be losing her looks." This remark is often heard about girls who were once noted for their sparkling eyes, their rosy cheeks and their vitality. The cause is not far to seek—they have become anaemic; that accounts for the pallor and the loss of charm. The anaemic girl, if she neglects her health, may be a sufferer all her life.

Take heed, you pale, anaemic girls. Plenty of fresh air, nourishing food and rest will help you, but what you need most is good blood. Those wretched headaches; that fickle appetite and those terrible heart palpitations can only be banished if the blood is rich, red and pure.

Good blood—the kind that brings good health is created by Dr. Williams' Pink Pills. The whole mission of these Pills is to build rich, red, health-giving blood. The Pills are sold by all dealers in medicine or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

High Educational Standard

Canadian School System Impresses Educationists

Visitors to Canada are invariably impressed with the country's educational system, particularly if they be men especially interested in the subject. It is greatly to be doubted if any nation on earth excels our own in the matter of schools of all kinds. Our educational system is thorough always, standards are high and our graduates emerge from schools and colleges with diplomas that have always placed their services in great demand across the line.—Border Cities Star.

Do not allow worms to sap the vitality of your children. If not attended to, worms may work irreparable harm to the constitution of the infant. The little sufferers cannot voice their ailment, but there are many signs by which mothers are made aware that a dose of Miller's Worm Powders is necessary. These powders act quickly and will expel worms from the system without any inconvenience to the child.

Give the Devil His Due

An old Scottish woman, who had never been known to say an ill word about anybody, was one day taken to task by her husband, "Janet," he said impatiently, "I do believe ye'd say a guid word for the de'il himself." "Ah, weel," was the reply, "he may na be sae guid as he micht be, but he's a very industrious body."

The Man With Asthma, almost long for death to end his suffering. He sees ahead only years of endless torment with intervals of rest which are themselves fraught with never ceasing fear of renewed attacks. Let him turn to Dr. J. D. Kellogg's Asthma Remedy and know what complete relief it can give. Let him but use it faithfully and he will find his asthma a thing of the past.

Over a Hundred Varieties

A single tree with approximately 125 varieties of apples has been grown near Martinez, California, by George Upham. It took more than twelve years of experiments to obtain the phenomenon. Upham has been grafting branches to the original tree since 1918. In the spring the grafted limbs bud at different times with blossoms in dozens of shades.

Britain's Youngest Aviator

Miss Winifred Jess Drinkwater of Paisley, Scotland, is Britain's youngest aviator, having just received her pilot's license at 17, the minimum age for a British pilot. In flying solo she handles her machine like an expert. S. Baldwin, secretary of the Scottish Flying School, says she will be a great flyer.

Minard's Liniment has a hundred uses.

W. N. U. 1857

Her Two Children Had Summer Complaint

Mrs. J. J. MacDonald, Glace Bay, N.S., writes:—"I am the mother of six children, and would not be without a bottle of Dr. Fowler's Extract of Wild Strawberry in the house. My two youngest were very sick with summer complaint, and there was nothing I tried could equal that remedy, and I had tried most everything, but they could get no relief. 'Dr. Fowler's' made a change in both of them in less than two hours."

On the market for the past 35 years; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Car Elaborately Equipped

Fittings in Limousine Of Jugo-Slavian King Very Complete

A Packard sedan limousine, recently delivered to King Alexandria, of Jugo-Slavia, is said to be one of the most elaborately equipped automobiles in Europe. The space under the glass partition separating the rear compartment from the driver's space is divided into a number of compartments. A large locker in the centre is fitted with a leather lunch kit, equipped with a complete silver and gold table service. In a double compartment at the right are thermos bottles for warm foods and a large toilet case. Thermos bottles for hot or cold liquids are fitted into a cabinet at the left of the centre locker, and in the top of this space are a first-aid kit and a large cigarette case. A built-in compartment for the King's sword extends across the top of the three compartments, and the lid, which protects the sword against dust, becomes a shelf when closed. Immediately in front of this is a tray to accommodate road maps.

Minard's Liniment aids tired feet.

Source Of the Thames

Seven Springs In Cotswold Hills Feed World's Most Famous River

How many people—even among the millions who live upon its banks—could say offhand where the source of the Thames was to be found? The fact that so few of us know anything about the beginnings of the world's most famous river is reflected in the statement, that, until recently the Thames had its source in a rubbish dump. Now the rubbish has been cleared away, and visitors to the source will find a little pool in a wood hollow, with, at one side, a stream gushing out. It is Seven Springs, the source of the Thames; but there is nothing to tell anyone that this is the case, and in the quiet Cotswold Hills, where Seven Springs is situated, we are not thinking of London and London's River. However, a plan is now on foot to lay out the site in a worthy manner and to build a fountain through which the Seven Springs may flow.

British Capital For Alberta

Anglo-Western Oils Limited To Commence Development Work

Five million dollars of British capital, organized under the name of Anglo-Western Oils Limited, with a federal charter and headed by Sir Edward Manville, chairman of the Phoenix Oil and Transport Company, and of the Daimler Company, both of Great Britain, has been made available for Alberta oil development, according to an announcement made in Calgary recently.

The announcement was made by J. C. Dallas, managing director of Calmont Oils Limited. Mr. Dallas said the company had acquired 490,000 acres in Alberta and two wells would be sunk immediately in the Milk River area.

"I notice that customer you just attended to didn't buy anything, yet he seemed pleased," said the eagle-eyed floorwalker. "What did he want to see?"

"Me, at 8 o'clock tonight," replied the pretty clerk, blushing.

How a disease wipes out human beings who are not resistant to it, was shown when influenza was introduced into a Labrador community by 360 Eskimos, causing the death of 300.

THE NEW TRAFF

The new tariff rates that went into effect on the first of this month have already caused a rise in the high cost of living to the people of Canada. With the protection given to the glass manufacturers, results the immediate rise in the price of this article and we are informed that the cost of glass will rise to almost double of what it is now. When Hon. R. B. Bennett proposed this new tariff schedule he said in the House of Commons on September 16th: "In the event of there being any price increases imposed by reason of these duties the Governor-General-in-Council will have the right to reduce or remove those duties. This is the answer that I give as to steps that are being to safe guard the rights of the consumer." If Mr. Bennett's words are to be taken as the standard which he will follow it should not be long before this new tariff rate on glass will be lifted so that the price to the consumer will remain as it has been for the last year.

Mr. Bennett made a grave mistake when he abolished the old Tariff Board. This Board could have worked in with the new tariff rates and where instances such as the above occurred, the Board could make a thorough investigation into the rise in price to the consumer and in the case of the glass manufacturers, this Tariff Board could

investigate the actual cost of glass production and after allowing a fair profit to the manufacturer, they could then set the tariff rate to encourage Canadian manufacture and at the same time come to an agreement with the manufacturer that his price would not be above that set by the Board. This would tend to increase Canadian manufacturing, and the same plan of investigation could be followed in connection with the rise in price of any manufactured goods, when a complaint of such rise had been brought to the notice of the Tariff Board. Unless close observation of the price of manufactured goods is kept by the Government, the present High Tariff plan will only result in an increase in the high cost of living.

BUY AT HOME

People who persistently buy from door-to-door peddlers admit their lack of faith in the home town.

It does them no good and they usually get articles inferior to what they can buy at the stores of the home town.

Quality and price go hand in hand. Local merchants aim to handle only merchandise of standard quality. If any manufacturer puts over inferior quality on them and they pass it on to you, they are easy to find and will make quick adjustment. When you buy from a peddler there is no adjustment.

When you buy from peddlers, you brand yourself as a failure in helping to build up the home town.

If all the citizens patronized the peddlers there would be no home town.

Citizens who persistently buy from peddlers serve notice to their neighbors that they are helping to wreck the home town. They admit their failure as good citizens.

Buy from the merchants of your town! Don't pull down the business of your town by sending your money away to build up business for some other city.

BABY'S PILLOW

It should not be there! So say experts on Good Posture, who have been examining the round shoulders of the rising generation. Mothers may not be aware that a child with round shoulders has diminished chest capacity, and lessened strength in consequence. Mother explains this condition by telling of rapid growth and forgets that it is really due to a bad habit of poor posturing.

There is no greater aid to good

than to acquire good posture. It has a mental as well as a physical value, for a fine bearing helps a lad through life, both at school and in business.

Look at Billy when he comes out of his tub. Are his shoulder blades protruding when he stands sideways towards you? If they are they are not quite right and Billy must be given some good setting up exercises every day. Let Billy's mother do them herself for a few minutes with the children in the morning. She must make time, for it is of the highest importance to have backbone and shoulder blades just right.

Baby does not need any pillow in his cot and his bedclothes must not press too tightly at the bottom. Let the feet move freely and there's an excellent book of Good Posture offered free to parents by the Red Cross, 407 Civic Block, Edmonton. Send for your copy to-day.

THE BACON CYCLE

"The production of hogs in Canada at the present time is at the low point in the production cycle," state the Live Stock Branch of the Dominion Department of Agriculture. Current supplies, and supplies in prospect are not more than sufficient to meet a very active home demand. It is noted, however, that there has been very little falling off in hog production, but rather that supplies have failed to keep pace with a growing domestic consumption. There are signs at the present time that the coming year may show a substantial increase in bacon production while at the same time the re-adjustment of prices may result in the resumption of bacon exports.

WELL-NAMED WISE

Dr. H. W. Wood has again demonstrated his balanced judgement in giving no support to the movement in Saskatchewan for a compulsory pool. The hope of the Saskatchewan farmers that this might become a legislative measure has met with some rebuff from the government of that province. Many private members are said to be opposed to the plan. It receives no co-operation from the head of the Alberta Wheat Pool, and their failure to attend the compulsory Wheat Pool parley at Regina is proof of their attitude.

Dr. Wood gives his cheering assurance that regardless of what Saskatchewan may see fit to do, the Alberta

Pool proposes to go ahead with its marketing on old lines, meeting adverse conditions as they may arise. In this, he doubtless has a one hundred per cent. backing from all Pool members.

(517)

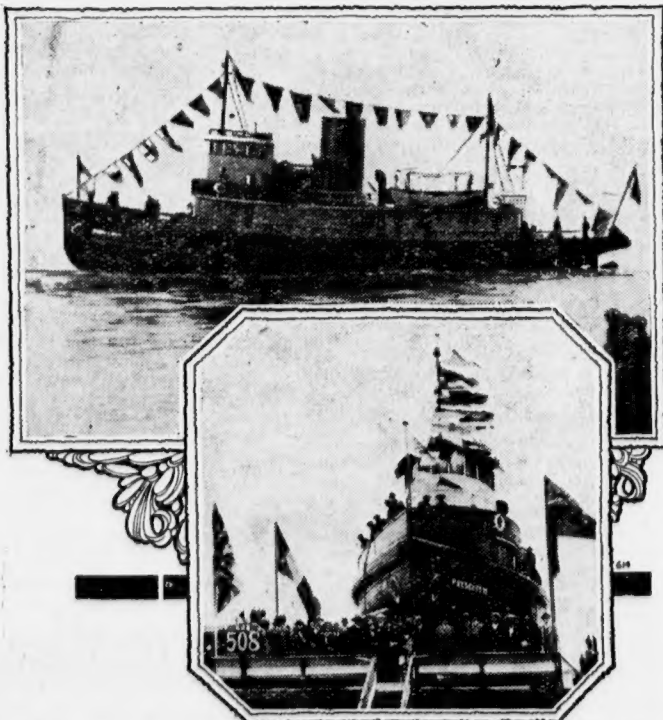

One of the biggest game bags ever to be taken out of the Canadian Rockies has fallen to the gun of Angus Hodgson, of Montreal, who has been hunting in the Kootenay Valley. It includes two deer, two Rocky Mountain goats, one moose, one elk, and one black bear. At the end of his trip he spent six days tracking a monster grizzly and with one bighorn ram he would have had the limit of every animal possible to get which the law allows him.

Comprising the largest one-day movement of apples out of British Columbia this season, the Canadian Pacific Railway recently operated four special freight trains over the mountains, making a shipment of 113 carloads of McIntosh Reds to the Prairie Provinces and as far east as Kenora.

Riding moose across New Brunswick lakes and rivers is beginning to rate as the coming new craze, says Major McGeehan, noted New York sport and magazine writer, who has been spending a Fall outing in the Miramichi and Cain's River districts. Up to the present the moose ridden have been cow moose but Rev. Thomas Travis, of Montclair, N.J., appears to be the first who has ridden a bull moose which was done in the Key Hole of Grand Lake, about 35 miles from Fredericton. Now other sportsmen are taking up the pastime until it begins to look as though sportsmen in New Brunswick will be getting the habit of crossing lakes and rivers on mooseback.

Canada's First Electric Tug

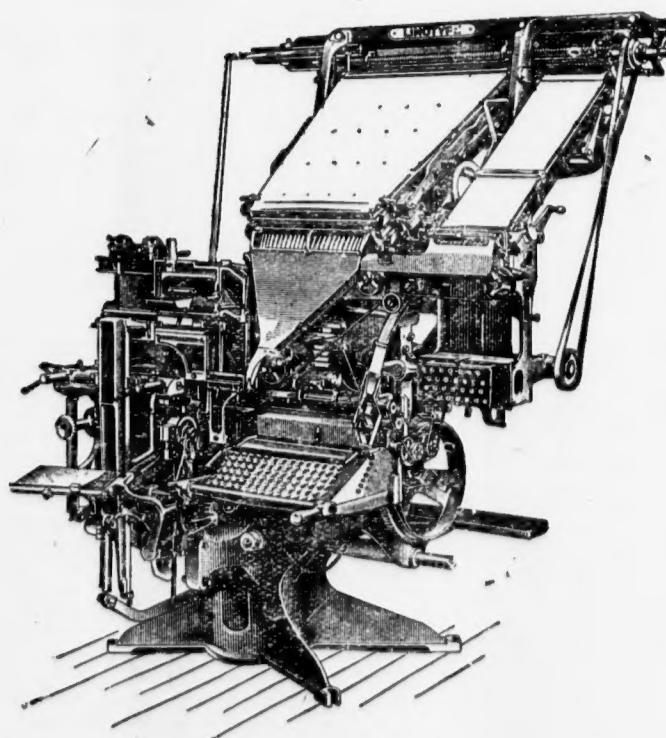

The first electrically-driven tug to be built in Canada was launched at Lauzon, Que., recently, when the "Prescott", Diesel-electric tug for the Canadian Pacific Car and Passenger Transfer Company's service between Prescott, Ont., and Ogdensburg, N.Y., slipped gracefully into the waters of the St. Lawrence after the traditional bottle of champagne had been broken across her bows by Mrs. Duff, wife of M. McD. Duff, manager of the Canadian Pacific Great Lakes Steamship Service. As a pioneer

feature in Canadian shipping, the Diesel-electric engines with which the new vessel is equipped, are of special interest to marine engineers. Each of 500 H.P., they are directly connected to twin generators capable of delivering 330 kilowatts, each at 250 volts, when operated at 245 revolutions per minute.

In operation, a car barge with three tracks for 16 hundred-ton cars, will be lashed to the starboard counter of the tug which it will be possible to control either from its own wheel-house or from the bridge of the car barge.

PLEASURE

The tingling taste of fresh mint leaves is a real treat for your sweet tooth.

WRIGLEY'S

Affords people everywhere great comfort and long-lasting enjoyment. Nothing else gives so much benefit at so small a cost.

It is a wonderful help in work and play — keeps you cool, calm and contented.

AFTER EVERY MEAL

WORLD HAPPENINGS BRIEFLY TOLD

Canada has twelve factories for the manufacture of macaroni and the annual production has a value of about a million and a half dollars, according to the latest figures from Ottawa.

Premier James H. Scullin, of Australia, making his first appearance before the League of Nations Assembly, denounced armaments as a menace to peace and urged the League to call a general disarmament conference.

A cable received by the Child Welfare, Inc., New York, from its administrative committee in China, said 5,000 children are dying as a result of famine and that war and communism are adding difficulty to the situation.

The committee which will administer the War Veterans' Allowance Act, was appointed by the late Federal Government, and its personnel is now preparing for the operation and administration of the act.

The superannuation of E. R. Cameron, K.C., as registrar of the Supreme Court of Canada, was announced at the Prime Minister's office at Ottawa. He is succeeded by James F. Snelle, K.C., a lawyer of Ottawa.

Portage la Prairie, Man., known for its No. 1 hard wheat, has added new laurels to its brow. On the farm of J. Prout, one mile from the town, peanuts and almonds have been produced this season. He grew two sacks of peanuts and a few pailsful of almonds.

James C. Brady, former Conservative member of parliament for Skeena, B.C., has been appointed a census commissioner of the demography branch of the Dominion Bureau of Statistics. Mr. Brady will organize the census of institutions such as hospitals, asylums, penitentiaries, and house of refuge all over Canada.

Mrs. M. Milner, aged 96, is still busy making cane seats at Wycombe, England.

Real dyes give richest colors!

FOR every home use, Diamond Dyes are the finest you can buy. They contain the highest quality anilines that can be produced.

It's the anilines in Diamond Dyes that give such soft, bright, new colors to dresses, drapes, lingerie. Diamond Dyes are easy to use. They go on smoothly and evenly; do not spot or streak; never give things that re-dyed look. Just true, even, new colors that keep their depth and brilliance in spite of wear and washing. 15c packages. All drug stores.

Diamond Dyes Highest Quality for 50 Years

I NO LONGER SUFFER WITH

writes Mr. M. McArthur. Thousands say constipation, liver trouble, indigestion, gas and over-night "fruit-a-tives" nerves quiet. Get "Fruit-a-tives" from druggist today.

W. N. U. 1857

Wins First Prize For Layer Cake

Above is a photograph of Mrs. W. McKenzie, 9 Fernwood Park Ave., Toronto, to whom was awarded the first prize for layer cake, at the Canadian National Exhibition, Toronto. There were a large number of entries of cakes of various kinds and Mrs. McKenzie not only won first prize for iced layer cake, but also for muffins and small cakes. We give below the recipe used by Mrs. McKenzie for the prize-winning cake.

Golden Layer Cake:— $\frac{1}{2}$ cup butter; 1 cup sugar; yolks of 6 eggs; $\frac{1}{2}$ cup milk; $1\frac{1}{4}$ cups flour; 4 teaspoonsful Magic Baking Powder; 1 teaspoonful of orange extract. Cream butter and sugar, add well beaten yolks and beat again with butter and sugar until very light. Sift flour and Magic Baking Powder together and add to first mixture alternately with milk. Beat lightly for about one minute, put into greased layer pans and bake. Temperature 400 degrees Fahrenheit. Time about 20 minutes. Put together with lemon filling and ice with boiled frosting.

Lemon Filling:—1 lemon and rind; 1 cup cold water; 1 cup sugar; 1 egg; 1 tablespoonful flour. Beat lemon-rind and egg together. Stir in lemon juice and sugar. Dissolve flour in water. Cook in double boiler till it jellies and spread.

Boiled Frosting:—Dissolve a cup of granulated sugar in $\frac{1}{4}$ cup of hot water. Wash down the sugar from the sides of the pan, cover and let boil three or four minutes, uncover and let boil to a rather firm soft ball stage. Pour in a fine stream on the whites of 2 eggs, beaten dry, beating constantly meanwhile. A few Marshmallows chopped and added to the frosting gives a delicious and pleasing flavor.

Douglas' Egyptian Liniment makes the finest blister known. Invaluable for stock. Leaves the hair roots in natural and healthy condition. Hair comes back. No scar remains.

Tour To the Orient

Business Men To Sail On Chamber Of Commerce Tour To Japan and China

Several business men of Edmonton and Calgary have already signified their intention of joining the Canadian Chamber of Commerce tour to the Orient, which sails from Vancouver on the "Empress of Asia" on October 16th. The tour will include a visit to Japan and reception by the Japanese Government, and trips to Shanghai, Nanking, Hong Kong and Canton, and the members will be back before Christmas. The tour is not limited to members of Chambers of Commerce and Boards of Trade, but is open to the general public as well.

Athletes recommend Minard's Liniment.

School For Flin Flon

Mining Town In Northern Manitoba Town To Have Public School

Efforts of the mining town of Flin Flon to have modern public school instruction this year have at last been successful, according to word received in The Pas. Equipment is now being installed in the class rooms, and it is expected that work will begin within ten days.

Financial plans are about complete. With grants from the province, the town, and with the aid of the Hudson Bay Mining and Smelting Co., grades up to eight will be taught this year.

It has been decided to engage Miss Doris M. Foster, of Winnipeg Beach, to teach the primary grades, and Miss Margaret Sutherland for grades three, four and five.

In days of yore if anybody missed a stage coach he was contented to wait two or three days for the next one. Now he lets out a squawk if he misses one section of a revolving door.

A copy will be mailed free on request.

Look for this mark on every tin. It guarantees that Magic contains no alum or any other harmful ingredient.

MAGIC BAKING POWDER

never varies

Its uniform leavening qualities give the same satisfactory results with every baking.

3 out of every 4 Canadian housewives,* who bake at home, say they use it because it does give consistent, better baking results.

If you bake at home, the New Magic Cook Book will furnish you with dozens of attractive baking suggestions.

Try this Recipe for Muffins

1 tablespoon butter
2 tablespoons sugar
2 eggs
2 $\frac{1}{2}$ cups flour

3 teaspoons Magic Baking Powder
 $\frac{1}{2}$ teaspoon salt
1 cup sweet milk

Cream butter and sugar. Add eggs one by one, beat well. Sift dry ingredients together and add to first mixture alternately with milk. If batter not stiff enough, add a little more flour. Put in well-greased muffin pans and bake for 20 minutes in a quick oven.

*This fact was revealed in a recent Dominion-wide investigation.

STANDARD BRANDS LIMITED
GILLET PRODUCTS

Recipes For This Week

(By Betty Barclay)

BREAKFAST MUFFINS

2 cups special cake flour, sifted.
4 teaspoons baking powder.
 $\frac{1}{2}$ teaspoon salt.
1 egg, well beaten.
 $\frac{1}{4}$ cup milk.
4 tablespoons butter or other shortening, melted.

Sift flour once, measure, add baking powder and salt, and sift again. Combine egg and milk and add to flour, beating until smooth. Add shortening. Bake in greased muffin pans in hot oven (400 degrees Fahrenheit) 25 minutes. Makes 10 muffins.

BAKED FISH

1 average helping filleted flounder, fresh haddock or whiting.
2 tablespoons butter.
Salt and pepper.
1 lemon.

Grease a plate and lay the fish on it with the skin side upwards. Put in the oven five minutes and the skin can be easily removed. Melt butter in a flat pan, lay fish on it and place in hot oven 400 degrees Fahrenheit, eight to ten minutes. Baste twice while baking. Remove season and squeeze lemon juice over. Serve hot.

To have the children sound and healthy is the first care of a mother. They cannot be healthy if troubled with worms. Use Mother Graves' Worm Exterminator.

New Market In Egypt

Trial Shipment Of Apples Being Made From Okanagan Valley

A new market for British Columbia apples in Egypt is being opened up by a trial shipment there, under arrangements completed by the provincial department of agriculture.

This shipment will consist of 2,000 cases from the Okanagan Valley at a price to net the growers a profit which would be small in a domestic market but satisfactory in an export market. The agricultural department believes that Egypt will offer a large market for British Columbia fruit in the future and is anxious to cultivate this business. A few apples from this country have found their way into Egypt before, but the market has never been built up in a big way.

In many parts of Africa there is a tree which bears large seeds, resembling huge sausages.

A Shaving Lotion

When mixed with sweet oil, Minard's serves as an after shaving lotion and antiseptic. Soothes and freshens the skin.

SUNDAY SCHOOL LESSON

OCTOBER 5

ZACHARIAS AND ELISABETH — Life In a Pious Jewish Home

Golden Text: "And they were both righteous before God, walking in all the commandments and ordinances of the Lord blameless."—Luke 1.6.

Lesson: Luke 1.5-8.

Devotional Reading: Psalm 122.

explanations and Comments

A Righteous Couple, verses 5, 6.—In the days of Herod, King of Judaea (Herod the Great, who reigned from 37 to 4 B.C.), there lived a priest named Zacharias, of the course, or group of Abijah. "David divided the priests into twenty-four courses, each of which in rotation was responsible for the temple services for a week. Each course, therefore, officiated twice a year, at an interval of six months. After the captivity only four courses returned, but these were subdivided into twenty-four courses under the old manner. The course of Abijah is said to officiated in April and October." The wife of Zacharias, who was a descendant of Aaron, was called Elisabeth. Their home was in the hill country south of Jerusalem. Both were righteous before God, strict Jews who observed the Mosaic law, kept all the commandments and ordinances. They were not faultless, but blameless according to the Old Testament standards.

The Birth and Naming Of John verses 57-66.—When Elisabeth's son was born, all her neighbors and relations rejoiced with her. "There is nothing else in the world so important as children, nothing else so interesting." — David Starr Jordan. Those present at the circumcision of the child when he was eight days old, wished to name him Zacharias after his father, but Elisabeth said, "Not so; but he shall be called John." See verse 13. "John" means "the grace of God." "There is none of thy kindred that is called by this name," they said in astonishment, and turning to the father, they asked him what the name should be, making use of signs, for he seems to be supposed deaf as well as dumb. (Verses 18-20. "Five words cost Zacharias forty weeks' silence." — Thomas Fuller. "Various suggestions have been made to evade the conclusion that he was deaf; that men are very apt to treat a dumb person as if he were also deaf; that they communicated by signs instead of by speech to spare the feeling of Elisabeth, whose judgment was being appealed from; that a sign was all that was needed, Zacharias having heard all that was said."—Expositor's Greek Testament. Zacharias called for a writing tablet a tablet covered with wax, and upon it he wrote with a stylus, "His name is John."

Then Zacharias burst forth into speech, blessing God. The people were much impressed by his recovery of speech and by the unexpected name given the babe, and they perceived that some great future was before the child. "What, in view of these things, shall this child be?" they asked. "For the hand of the Lord was with him," the Evangelist comments.

Strength Of Canadian Woods

A comparison of strength values of wood of sugar maple and yellow birch show that sugar maple is considerably the stronger in the green condition, whereas after seasoning, they are of approximately the same strength. This is revealed through publication of results of the physical and mechanical properties of Canadian woods by the Forest Products Laboratories of Canada, Department of the Interior.

Alberta Dairy Record

Last Year 95 Creameries Produced Sixteen Million Pounds Of Butter

The dairy record of the Province of Alberta is an encouraging one. In 1912 the province had only 53 creameries producing a little over 3,000,000 pounds of butter. Last year there were 95 creameries with an output of 16,000,000 pounds. In 1912 six cheese factories produced but 40,000 pounds of cheese, while last year ten factories produced over a million pounds.

DO YOU SUFFER WITH HEADACHE?

So easy to get quick relief and prevent an attack in the future. Avoid bromides and dope. They relieve quickly but affect the heart and are very dangerous. They are depressing and only give temporary relief, the cause of the headache still remains within. The same and harmless way. First correct the cause, sweeten the sour and acid stomach, relieve the intestines of the decayed and poisonous food matter, gently stimulate the liver, start the bile flowing and the bowels pass off the waste matter which causes your headache. Try Carter's Little Liver Pills. Druggists 25c red pkgs.

Find Early Coins

Interesting Discovery In Wales Of Gold Coins Minted In 1340

Thirty golden nobles, in perfect condition and apparently fresh from the Mint where they were struck to celebrate the defeat of the French fleet by Edward III., at Suys, in 1340, were discovered recently on the edge of an ancient road leading from Taliesin, Cardiganshire, to the Dovey Estuary, where a ferry in olden days carried travellers across to North Wales.

The coins depict an English warship breasting the waves and surmounted by the English coat-of-arms and the King's head.

Pure Bred Sire Areas

Twenty-eight rural municipalities in the Province of Saskatchewan have been established as pure-bred sire areas, which means that these areas have become entirely free of scrub sires.

Rheumatism?

Quick relief from rheumatic pains without harm:

To relieve the worst rheumatic pain is a very simple matter. Aspirin will do it every time! It's something that you can always take. Genuine Aspirin tablets are harmless. Look for the Bayer Cross on each tablet.

CHAPTER I.

When, after years of slavery to the whims of a hard old uncle, Nicholas Hastings went forth on his quest for freedom, he started tramp-wise, his belongings tied in a blue-checked handkerchief which he had bought for the occasion. For years he had foreseen this departure from the home of his fathers—the haughty farewell he should bestow upon an irate uncle—the tears of his gentle Aunt Nettie when he took her in his arms. But Fate frustrated those plans. His patient little aunt had been laid away in Elmwood Cemetery two months before; and only a week ago his uncle had followed her, as if, Nick thought with grim and sacrilegious humor, he was loath to let her enjoy a peaceful residence in her Heavenly Mansion.

So there were no farewells to say. Instead, Nick left by the back door (because he didn't want Selina Smith, the village gossip, to see his stick and handkerchief), and stood for a moment looking off at the familiar landscape.

He had always loved the view from this little porch. An orchard sloped gently to a green interval, through which a sleepy river travelled to the sea. One wouldn't have dreamed that the house stood on a dusty thoroughfare. From here were visible only "green pastures and still waters." Nick could remember sitting here with his mother on summer evenings, and after his mother's death, with old Aunt Nettie. For a moment a wave of tenderness for the place swept over him; then youth flooded back with an intoxicating exhilaration. He slipped the door key into his pocket, and with no tinge of regret vaulted the stone wall and strode across the orchard, where, once beyond the eyes of curious neighbors, he would strike into the broad highway.

Free! No more toiling over ledgers in that stuffy corner of the First National Bank! No more horrible deceit when he got a raise, for fear his uncle would claim it for added board. No more stifling of natural impulses. How had he endured those years?

"I've been a slave," said Nick, pausing beneath an ancient apple tree, "but I'm a slave no longer. I can conquer the world!"

Then, because he knew he was behaving like a foolish little boy, he laughed at himself, and reaching up, picked a spray of apple blossom, breathing deeply of it.

"May!" he exclaimed. "May in New England—and I'm free! Gee! how I've longed for just this moment—longed to start out with no cares or responsibilities—without even a destination, and all my possessions in a blue bandanna! As Gay would say—"

He stopped, suddenly, at an amazing thought. He had forgotten to say good-bye to Gay! What a cad he was—especially when she was alone in the world like himself. He might send her a postcard—but no, that wasn't fair. Gay had always sympathized with his dreams and encouraged him—

to believe they would come true, as they had. In these last busy days of settling affairs, he had—forgotten her.

"I'm an ungrateful scoundrel," he told himself; and though it meant retracting his steps, and the risk of passing Selina Smith's back windows, he faced about immediately, and was rewarded by the sight of a pink-clad figure bending above some budding jonquills. Nick whistled softly, and, starting up, the girl faced him.

"You're off—so soon?"

The color that pounded in her face might have come from her sudden change of attitude, or from emotion. Nick never saw it, so wrapt was he in his own affairs.

"I'm off," he echoed. "Did you suppose I'd stay here mourning my dear late uncle? Don't look so shocked, Gay. I needn't pretend to you, need I, that I'm bereaved?"

"I'm not shocked," the girl protested instantly, "only surprised. I've been thinking every day that you'd run in—"

"My dear, I've been deep in—packing."

He laughed, proudly displaying his handkerchief and stick.

The girl laughed too, and said: "Where are you going?"

"Where?" Nick looked at her reproachfully. "Have you shared my plans so sparingly all these years, Gay, that you ask that question? Where indeed! To the ends of the earth!"

He threw both arms wide, as if to embrace the universe, and Gay smiled; a wistful smile that caught at something in his heart which hitherto had remained untouched.

"I wish I were a man, Nick."

He answered, his eyes devouring her sweet girlishness: "You're pretty nice as you are. I don't think I'd want you changed, Gay; and I don't believe you would change, if you could."

She sank down on the grass beside the jonquills, and, as if he had forgotten his haste to be away, Nick sat beside her, his hands clasped round his knees.

"No," she said honestly, "I wouldn't change, of course; but it must be wonderful to start off as you are starting, Nick. Do you suppose I, too, don't long to go 'to the ends of the earth'? Do you imagine I like living here with Sadie Twichell, and sewing on other women's clothes in order to pay my board?"

Nick looked at her, his brows drawn into a frown.

"Do you know," he admitted, "I never thought of it. It's because you're a girl. Somehow one doesn't expect a girl to go a-gypsying, though why she shouldn't—Gay," he broke off suddenly, "what pigs men are!"

She laughed.

"One would hardly call you that, Nick, after the way you stuck by your Aunt Nettie."

"But I am," said Nick, still frowning. "I came to say good-bye to you," (his honesty made him want to reveal the fact that in selfishness he had almost forgotten the farewell, but his kind heart forbade the disclosure that he knew would hurt her). "I came to say good-bye, never thinking that you, too, might long to do what I am doing. I'm ashamed of myself, Gay. What must you think of me?"

"I think," she said, meeting his eyes soberly, "that you're getting just what you deserve—a good time. What do you think of me, to imagine for a moment that I don't rejoice with you? Nick, you're only a boy, and you've never had much fun. Why shouldn't you be a little thoughtless? I—I believe I'm glad you are!"

He stirred, a bit uneasily, while Gay added with an understanding smile: "I mustn't keep you. I know you're chafing at the bit."

She arose, leaning down to brush an imaginary something from her skirt; and as he got to his feet she stretched out a friendly hand.

"Good-bye, Nick. The best of luck to you."

He took her hand, squeezed it hard, and lifting the stick and bundle, said, with a gaiety that was a little forced: "Well, I'm off. I'll drop you a postcard from California, or Alaska, or Timbuctoo, or wherever I happen to land. Good-bye, old friend."

He found it unaccountably difficult to meet her eyes, so didn't meet them. But he got away. He got as far as the stone wall that divided Miss Sadie's land from Selina Smith's. Then he turned, though even as he did so something warned him that it is dangerous to look back. He turned squarely about, his hand raised in a last salute.

HOW ONE WOMAN LOST 47 POUNDS OF FAT

"I have been taking Kruschen Salts for nearly 3 months. I have continued taking one teaspoonful in warm water every morning. I then weighed 217 pounds, was always bothered with pains in my back and lower part of abdomen and sides."

"Now I am glad to say I am a well woman, feel much stronger, years younger and my weight is 170 pounds. I do not only feel better but I look better, so all my friends say."

"I shall never be without Kruschen Salts, will never cease taking my daily dose and more than glad to highly recommend it for the great good that is in it."—Mrs. S. A. Solomon.

"P.S.—You may think I am exaggerating by writing such a long letter but truly I feel so indebted to you for putting out such wonderful salts that I cannot say enough."

Gay was standing just where he had left her, but it seemed to Nick that all the buoyancy of youth had dropped from her. She was leaning against the gnarled trunk of an old apple tree, with the jonquills at her feet and the pink, sweet blossoms all above. In her pink gown she should have looked the embodiment of spring; but in reality she drooped, like a flower plucked by some ruthless hand and left to die. Nick couldn't bear it. He tossed his stick and bundle, emblems of freedom, to the ground, and strode back; while Gay, pulling herself together, ran to meet him.

"Did you forget something?"

"Yes," said Nick. "I forgot the best friend a fellow ever had. Gay, listen. You'll think me crazy, but—why don't you come along?"

"With you?"

Her eyes widened at the amazing proposition.

"Why not? It would be bully. I—"

Fortunately for Gay there was a rustic bench behind her. She sank down breathlessly, while Nick, with a cautious glance at the hedge that hid them from Selina Smith, took the place beside her.

"We could have the time of our lives," he urged. "I've always done things alone, but with you along—"

Gay found her tongue.

"I believe you are crazy," she said sternly. "What would people think? They'd say—"

"Oh, Lord!" Nick interrupted, with a characteristic grin. "I meant, of course, that we'd get married first."

"Get married!"

He laughed at her amazement.

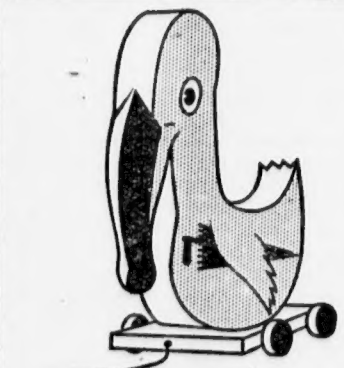

"Why not? It's been done before. We're both of age, you know. Why shouldn't we?"

"But—you don't love me."

"Nonsense! I love you a lot. Always have. Of course, if I'd bore you—"

(To Be Continued)

Wealthy residents of the ill-fated city of Pompeii had houses consisting of as many as forty rooms.

for
ANY CHILD

WE can never be sure just what makes a child restless, but the remedy can always be the same. Good old Castoria! There's comfort in every drop of this pure vegetable preparation, and not the slightest harm in its frequent use. As often as your child has a fretful spell, is feverish, or cries and can't sleep, let Castoria soothe and quiet him. Sometimes it's a touch of colic. Sometimes constipation. Or diarrhea—a condition that should always be checked without delay. Just keep Castoria handy, and give it promptly. Relief will follow very promptly; if it doesn't, you should call a physician.

**Fletcher's
CASTORIA**

After Thirty-Three Years

Bodies Of Arctic Explorers In
Excellent State Of Preservation

The bodies of Salomon August Andree and his two companions, according to the dispatches, were in an excellent state of preservation when they were found on White Island in the Arctic Sea, although it has been thirty-three years since they disappeared. This curious refinement of cruelty in the frigid parts of the earth, to preserve for years the appearance of life even in death, has made its impression on the human imagination long before now.

We recall a short story many years ago about a couple who went to the Alps on their honeymoon. The man fell into a crevasse and the guides were unable to recover his body. The girl, frantic with grief, consulted scientists as to what she could do. They told her that the glacier moved a few inches a month; at the end of fifty years, perhaps, it would move far enough to make possible penetration of the crevasse. So for fifty years she waited. And at the end of that time the body was recovered, and she by now an old, decrepit woman, was permitted to look at the body of her husband. It was perfectly preserved, and she saw the handsome boy she had married fifty years before.

The Third Emigration

Russia Worried Over People Who
Will Not Come Back

The Russian Government is considerably worried over what has been designated as the "third emigration." The first emigration was that of the Socialists and anarchists in czarist days. The second was that of the one or two million Russians who fled to all parts of the world from the bolshevik terror. The third is that of the "nonreturners," soviet citizens appointed to diplomatic or other posts abroad who refuse to go back home when so ordered. The penalty for such refusal is death and confiscation of goods.

The third emigration is a striking indication of the conditions of tyranny prevailing in Soviet Russia. When government officials, presumably selected for their special zeal in the cause, desert the ship of state in considerable numbers there is reason to believe that the soviet system ought to be confined to Russia.

The Poor Man's Friend.—Put up in small bottles that are easily portable and sold for a very small sum, Dr. Thomas' Eclectric Oil possesses power in concentrated form. Its cheapness and the varied uses to which it can be put make it the poor man's friend. No dealer's stock is complete without it.

Is Fond Of Music

Ramsay MacDonald Listens In On
Radio Broadcast Programs

Ramsay MacDonald, Prime Minister of Britain, is a great-lover of music.

Speaking at the jubilee of the Guildhall School of Music in London, England, Mr. MacDonald said he had enjoyed many Sunday afternoons listening to the broadcast of Bach's church cantatas from the school.

"I confess that whether I am at home in my quiet peaceful house in Hampstead or down at Chequers," the Prime Minister's official residence, he continued, "I make it a rule to issue an order—and I am not given to that very much—that there shall be no engagement, no interference, no business, but that my friends and I shall retire to a quiet corner and spend a very inspiring, comfortable, and peaceful half-hour listening to the broadcasts."

No Room For Argument

At an exhibition of paintings, recalls Sir John Ross, former Lord High Chancellor of Ireland (in his reminiscences, "Pilgrim's Scrip"), this conversation was overheard between two women who were looking at a picture, "The Dance of Salome": "Now, what's that, Maria?" asked one.

Maria (glancing at catalogue): "Solomon dancing for Herod."

"But he never done it, Maria!"

Maria (tartly): "He musta done, else he couldn'ta been photographed."

He—"If your father catches me eloping tonight I wonder what he'll say to your mother?"

She—"He'll probably say 'Sh-h!'"

Minard's Liniment for Chest Congestion.

A Public
Danger.

**Caught Disease
On the HANDS!**

Skin disease threatens us every day. Invisible germs of blood-poison, eczema, etc., are waiting to infect the least cut or sore place. The money you use carries germs—you get them on the handles, rails and straps of the trains and street cars, and in a score of other ways.

Solely through Zam-buk, Mr. Henry C. Davis, of South 17th Street, Kansas City, U.S.A., has just escaped a virulent type of eczema, contracted, he suspects, through use of public towels.

"I had medical advice," he says, "tried in addition all sorts of so-called eczema remedies, without finding the hoped-for relief. Zam-buk treatment soon gave positive results. It took away the painful irritation and quickly purified and healed the deep troublesome sores."

Little Helps For This Week

"Blessed are they that keep my ways."—Proverbs viii. 32.

And oh! in my exceeding weakness, Make Thy strength perfect; Thou art strong; Aid me to do Thy will with meekness, Thou, to whom all my powers belong.

If thou wilt but go on with thy duties, desiring to love—in such cases the desire of loving is love in His sight,—the irksome dullness and dryness is the thorn in thy flesh, the messenger of Satan to buffet thee. But fear not; God's grace is sufficient for thee; His strength will be made perfect in thy weakness. Only set yourself in earnest to obey His voice. Say to Him, night and day, "Behold the servant of the Lord! be it unto me according to Thy Word."

—John Keble.

Persian Balm—the ideal toilet requisite for every discerning woman. Perfect in results. Creates complexions of rare beauty and charm. Delightfully cool and refreshing. Never leaves a vestige of stickiness. A velvety smooth lotion toning and stimulating the skin. Making it truly rose-leaf in texture. All dainty women invariably choose Persian Balm. It imparts that subtle distinction so characteristic of the elegant woman.

Feed Skim Milk

Feeding tests at the Cap Rouge Experimental Station of the Dominion Department of Agriculture show that it pays to feed laying hens skim-milk. Five years tests show that with a basal ration of grain meal, shell and vegetable feeds, hens fed skim-milk laid more eggs and gained more in weight than hens fed beef scraps. Incidentally the cost of skim-milk is just one-ninth that of beef scrap.

Nearly 1,400 automobiles a month are being imported into Sweden.

**Daughter Is
Stronger Now**

"My daughter Catherine is fifteen years old. She was very irregular, often sick at her stomach and had to stay in bed two or three days at a time. One of your booklets was sent to us by mail so I got her a bottle of Vegetable Compound. Catherine has been taking it regularly and she is gaining in weight and every way. I told the neighbors and four other girls are taking it with good results."—Mrs. Clarence Jenkinson, Box 14, Thomloc, Ontario.

**Lydia E. Pinkham's

HOOT GIBSON

— IN —

POINTS WEST

He was a fighting fool, and when he set out to get the man who had killed his father the outlaws trembled. See this swift moving tale of the west, in which a two-fisted, hard ridin' cowboy faces the fury of a gang and among them finds true Romance.

TOWN & COUNTY
Personalographs

The fire adjuster was out from Calgary on Monday of this week and looked over the damage done by the recent fire at the Carbon school. We understand that there was about \$1200 damage done on the building and that full repairs will be commenced within a few days. This will give some of the local contractors work for a while at least.

English Church services will be held in Carbon on Sunday evening at 7.30 p.m.

Cyril Poxon, who is attending Mount Royal College in Calgary, spent the week end at his home in Carbon. He returned to Calgary Monday on the Carbon Bus.

Jim Smith was a Calgary visitor last Saturday.

Eddie Sellens of the Bank of Montreal staff returned last Friday from a two weeks holiday.

Mr. and Mrs. Joe Johnson left by Motor on Saturday for Shanawan, Manitoba and expect to remain there. Mr. Thos. Johnson has taken over Joe Johnson's Regal Oil Agency here and will deliver to the farmers as usual.

A number of the Carbon golfers motored to Wayne on Sunday last to visit that club. The members of the Carbon Golf Club making the trip were: Messrs. A. F. McKibbin, F. Bessant, G. Peters, E. J. Rouleau, J. J. Greenan, L. Poxon and Wm. Smith.

A. F. McKibbin returned from Champion last Thursday. Mrs. McKibbin and daughter will visit in the southern town for a few days.

Messrs. Currie and Wallace have been busy for a couple of days this week putting plaster board on the interior of the Chronicle office. Jas. Gilbert has also been busy kalsomining the shop. The work is a decided improvement to the premises and this completes a long needed repair.

Mrs. Evans has closed the ice cream parlor on account of the lack of business in that line. There is still considerable competition in the ice cream business in Carbon.

A well attended dance was held in the Elks hall last Friday night. The Swallow orchestra furnished the music and the young people had a real enjoyable time.

Harvesting has been practically completed in the district now, although the recent rain held up one or two outfits in the district.

I. Guttman returned from a holiday in Calgary last Thursday. He expects to visit the city again this week in order to join his friends in celebrating their Jewish holiday.

Mrs. Jack Stevens left on Thursday for Calgary.

The Municipal District of Carbon held their regular monthly meeting in Carbon on Tuesday.

Born to Mr. and Mrs. George Zeigler, in the Drumheller hospital on Saturday, September 20th, a son.

An airplane passed over Carbon on Saturday night, and again on Sunday afternoon a plane passed over the town. With the oil excitement and the numerous planes the Village Council will soon have to consider the establishing of an air port here.

The Carbon Lawn Tennis Club held a very successful banquet in the Carbon Hotel Dining room on Tuesday night of this week. About 50 members of the tennis club, and their friends were present and a jolly evening was spent in bringing the season to a close. However, as long as the weather holds good the tennis courts will continue to be occupied.

The Saturday night dances will start again on Saturday night of this week. These dances have proved successful during the summer and they will now

be continued as long as they will pay their way.

A thunder storm passed over the district on Sunday night and a steady

rain followed Monday. The weather has now cleared off and we expect that the Indian Summer will now follow.

Mrs. S. McLeod arrived last Wednesday and is spending a few days at the home of Mr. and Mrs. R.C. Barr.

C. C. Turcotte put another door in the Elks hall last week. The theatre inspector was around some time ago and ordered this work done before any public function could be carried on in the hall. We understand that another door has to be put in the Carbon Theatre also.

CARBON TRADING CO.**Who Does Your Printing?**

All business houses need more or less printed matter, all of which is within the possibilities of the local printer. Yet how prone many are to pass up the home printer and let the orders go to city offices which have no interest whatever in rural communities except to get printing orders and the cash to pay for them. Business men, remember that the home paper is constantly promoting the interests of the home community and you owe it to yourself and your local paper to back up these efforts by at least having your printed matter done locally.
